Abstract

Everyone knows that `bookdown` is an excellent package for authoring books on programming languages. But it is only one side of the coin. It can do more than expected. Therefore I am developing `bookdownplus`. `bookdownplus` is an extension of `bookdown`. It helps you write academic journal articles, guitar books, chemical equations, mails, calendars, and diaries.

1 Introduction

The R package `bookdownplus` (Zhao, 2017a) is an extension of `bookdown` (Xie, 2016). It is a collection of multiple templates on the basis of L^AT_EX, which are tailored so that I can work happily under the umbrella of `bookdown`. `bookdownplus` helps you write academic journal articles, guitar books, chemical equations, mails, calendars, and diaries.
